Reze-Meric™ 8842

Reze-Meric™ 8842 is a high molecular weight film forming non-functional thermoplastic polyurethane.

Product Specifications	
Appearance	Clear
Solids Content (%)	41 ± 2
Viscosity (@ 25°C)	600 – 1,100 cP
Color (Gardner)	2 Max
Solvent	49% Isopropanol 10% n-Propyl Acetate

Key Features and Benefits

- ✓ Excellent lamination bond strengths in adhesive / extrusion laminations
- ✓ Excellent adhesion to various flexible packaging substrates including coated and treated polypropylene, coated and treated polyester, coated cellophane, polyethylene, and nylon
- ✓ Excellent printability
- ✓ Fast solvent release
- ✓ Very low solvent retention
- ✓ Low tack for increased block resistance
- ✓ Maintains flexibility at very low temperatures
- ✓ Excellent UV light stability

F.D.A Status

Although there is no section directly referring to non-food contact inks, reference can be made to other sections of the F.D.A. The composition of Reze-Meric™ 8842 conforms to the positive list of the American F.D.A. regulations, Chapter 21, Section 175-105 for laminating adhesives, where the ingredients are separated from the food by a functional barrier.

E.E.C. Status

The individual monomers used in the manufacture of Reze-Meric™ 8842 are listed in the Plastics Directive, Section 1, Part1, 'Authorized Monomers.'

REACH Status

All reactants are REACH pre-registered and as directed to be registered. We have as needed joined the required SIEF's for the reactant. Our only European representative isInfo-Care.
